

» A Simple Signage Solution

Here is a great product for those customers who need a quick and simple solution for an effective readerboard sign. These light weight sign panels are available in all the sizes and variations shown below. They are constructed with a light weight and durable plastic fluted core, which is covered with a durable fiber reinforced plastic laminate. It's light gray pebbled surface makes for a classy presentation in any use. All E-Z Trac preassembled readerboards come with aluminum rails to assure you the highest quality and durability of your sign. Combine this simple signage solution with all the benefits of your new E-Z Trac system and you've got a real winner. So now you know where to turn when the budgets are low and you need a quick, but effective sign that will last.

» Custom Headers

Custom Headers are made with a highly durable outdoor vinyl and are available in a one color, two color, or full color digital imprints.

Please send all artwork to: art@e-ztrac.com

» Upgrade Your Sign

Preassembled readerboards are also available with a high intensity white or fluorescent yellow background, which allows for visibility at night time without the need for illumination.

All of the readerboards shown below are available as single face signs. For double sided applications it is recommended that you use two single face readerboards back to back. This also ensures maximum strength against wind load.
